Principal's appeal to Parents on mobile phones

Esteemed Parents,
Eid Mubarak
Greetings from IIS Jubail

I feel proud to inform you that all our 8500 students are highly disciplined and well behaved in the school. The good news just received is 25 of our students have been given seats by NITs under DASA.

Last month our students bagged first place in the most prestigious "Patrons Medal" India Quiz Inter School competition held at IIS Dammam. His Excellency, the Ambassador of India, our Patron Mr. Ahmad Javed handed over the trophy and laptops to the winners.

Summer vacation is going to start, let our children enjoy their holidays, but to excel in academics, a systematic and planned schedule is necessary, effective study habit is necessary. Two months of vacation can be used to play, meet kith and kin and at the same time for revision and advance preparation.

We firmly believe that "The most valuable thing a parent can give to his child on this earth is 10 minutes of time every day". Kindly become an empathetic friend and see his/her educational progress, physical, emotional and social development. Through this tete-e tete we would like to speak on two current disturbing issues: (1) Misuse of mobile phones, (2) Breach of School Uniform, poor appearance of senior class boys, their pants and hair cut.

(1) Misuse of Mobile phones:

As we all love our children, we provide whatever is demanded by our kids. We must know that mobile phone addiction has not only distracted the attention and concentration of our students but brought them down in studies and in their moral values. The CBSE has advised the schools to strictly ban children carrying mobile phones to school.

We have been receiving a number of complaints that boys and girls have full freedom at home to misuse mobile, call anybody, contact and communicate with strangers, go out and meet with unrelated persons in Malls. This is scary and threatening our family values. Let us stop this please.

Both parents and teachers need to create awareness, educate and convince our children the consequences of taking pictures and videos of girls, teachers for fun and uploading them in an unethical way. Beating, hitting in the name of birthday celebrations, recording and circulating videos on social media is illegal and punishable offence. Kindly check what they are watching, with whom they are chatting.

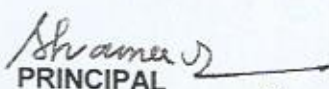

As a part of school's responsibility our I.T dept. and Computer Sciences dept. have started orienting all our students about legal issues, punishments on misuse of mobiles, internet, social media under Cyber Crimes. They get authentic information when they visit their computer lab in batches and phases.

Parents' cooperation "with love....not with anger" is required to help our immature children, understand the consequences of misuse of these gadgets.

(2) School Uniform and hair cut

The fad and influence of bad visual media is so much that some of our Senior class boys wear the pants dangerously hanging on their waists. Sometimes the pant is so tight not washed for many days, not ironed. A very strange hair cut that gives ugly appearance, this may influence other good and disciplined children to follow them as bad things spread faster than good.

The school discipline committee will be calling the parents to come and take such students back to their homes. If repeated, the matter will be informed to the Ministry of Education for further necessary action at their end. Such students will not be allowed to attend the school. Parents and teachers are requested to inform this till our boys understand to respect and abide by the rules.

PRINCIPAL
