CIRCULAR

Dear Parents,

Greetings!!

We are glad to inform you about the Learning Management System that the school is going to introduce as part of the TALEEM project. The distance learning platforms enable the students and teachers to make the learning process more effective, especially during this pandemic scenario where teaching and learning is possible only online world wide.

The two platforms namely (1) Next Education, for classes KG to V and (2) OAKS/TOPPRS for classes VI to XII are well reputed in catering digital learning services to the students and teachers.

The subject content, animation and illustrations are remarkably noteworthy, which helps the students to understand the concept very well and to the teachers to deliver their lessons effectively.

In addition, these platforms are fully loaded with question bank and has a wide range of scope to practice. And it is not only helpful to the students for their regular study but also to prepare themselves for competitive exams, such as NEET and JEE which would be a unique facility to the students studying abroad.

Teachers training sessions will help teachers to update themselves to the modern teaching techniques.

These platforms are accessible to the teachers and students 24/7 at ease. School will leave no stone unturned to provide best in education to our children.

The best part of it is, this facility is provided to the students without charging any additional fee and there will be no financial burden on parents.

The induction program for teachers is under progress and transition of using these platforms will be done shortly soon after the Half Yearly exams. The details of live classes for the students using these platforms will be communicated in due course of time.

Let us hope for the best out of it.
