So great is the effect of cleanliness upon man that it extends even to his moral character

Dear Parents,

We are aware that cleanliness is a state of mind. Cleanliness taught at an early age will get implanted well in the personality of the child making him/her a role model to others. Besides personal hygiene we must teach a child to keep his surroundings clean and his belongings neat and tidy. So we are pleased to inform you that we will be celebrating **cleanliness week** from **5th May to 9th May**.

As the class teachers are teaching the importance of cleanliness throughout the year, to emphasize it strongly, discipline in charges will check the child's personal hygiene (uniform, nails, hair etc) and their belongings(bags, books etc) during this week.

We are also pleased to inform you that **Hand Hygiene Day** will be celebrated on **5th May** to raise awareness about the benefits of hand washing with soap. Hand Hygiene practices are key measures in preventing infections at home, in the school and public institutions.

Thanking you for your usual co-operation.
