

# INTERNATIONAL INDIAN SCHOOL, AL JUBAIL

IISJ/PRL/133/2018-19

26<sup>th</sup> June 2018

## CIRCULAR

**“ENERGY CONSERVATION IS THE FOUNDATION OF ENERGY INDEPENDENCE”**

**Sub: HB Meeting on 22.06.2018 Advisory to schools**

All staff members are hereby instructed to switch off the electrical appliances such as ACs, Lights, Fans, and Computers etc, when not in use.

It is noticed that in many of the classrooms, staffrooms, wash rooms and office rooms, the electrical appliances are switched on even after the school and office hours. As a result of this lot of precious energy is wasted and this poses serious security issues also like short circuit and fire. As you may be aware, recently the electricity charges in Saudi Arabia also have been increased manifold. So it is more important to reduce the conservation of power.

All class teachers are requested to inculcate amongst students to conserve energy and water.

It is our collective responsibility to reduce the wastage of energy, conserve and preserve it for our future generations. Expecting your kind co-operation in this regard.

V.P (Admin) & O.S (Admin) are requested to kindly inform

- (1) All Staff members
- (2) Students
- (3) Cleaning Staff

**“ENERGY CONSERVED IS LIFE PRESERVED”.**
